

## Publication ethics and malpractice statement

The Journal of Biotech Research (JBR) is committed to complying with the guidelines of publication ethics and malpractice set forth by the Commission on Publication Ethics (COPE) (<https://publicationethics.org>). All JBR's authors, reviewers, editors, and publisher are expected to adhere to the standards of ethical conduct in scientific publishing based on the COPE Guidelines.

### Authors' responsibilities

By submitting a manuscript to JBR for publication consideration, all authors agree to the following responsibilities to ensure that:

1. Originality of the manuscript. Plagiarism is not acceptable.
2. Reporting original accurate results with sufficient details and references. Any fraudulent or inaccurate data or statements is unacceptable.
3. Limiting authorship to those who have made significant contributions to the work only.
4. No participants are harmed physically or mentally during the work to obtain the results. If the work used experimental animals or human subjects, a statement to specify that "all procedures were performed in compliance with relevant laws and institutional guidelines" must be included in the manuscript. In addition, an approval of an appropriate institutional committee needs to be included in the paper. Authors should also include a statement that "informed consent was obtained from participant" in the manuscript with human subjects. The privacy rights of human subjects must always be observed.
5. The manuscript has been read and corrected for clarity, grammar, and spelling by an English native speaker before submission, especially to author(s) whose first language is not English.
6. Submission of an article to JBR implies that it is an unpublished original work that has not been submitted or published in whole or part in the other journals or media.
7. No financial or other material conflict of interest that could influence the results or interpretation of the manuscript.

### Peer reviewers' responsibilities

Submitted manuscript will be reviewed by at least two independent peer reviewers and one JBR's editor. The peer reviewers' duties include:

1. assisting editor in making editorial decisions and the author in improving the manuscript through editorial-author communication.
2. making sure no conflict of interest with respect to the work, the authors, and funding agencies
3. notifying the editor immediately if the reviewer feels unqualified or unable to promptly review the manuscript.
4. keeping confidentiality for all reviewed manuscripts.
5. following the reviewing criteria below:
  - (1) originality of the work
  - (2) relevance to biotechnology

- (3) background, hypothesis, objectives
- (4) methodology appropriate described
- (5) results concise and sufficient
- (6) discussion with correct interpretation
- (7) correct language, proper cited references, high quality figures.

### **Editor's responsibilities**

The editor of JBR holds the full authority to reject/accept a submitted manuscript. The editor's duties include:

1. making the final decision based on the scientific merit, relevance to JBR's scope, and the recommendations of peer reviewers without regard to race, gender, sexual orientation, religious belief, ethnic origin, citizenship, or political philosophy of the authors.
2. maintaining the confidentiality of all submitted manuscripts other than the corresponding author, reviewers, potential reviewers, other editorial advisers, and the publisher, as appropriate.
3. no conflict of interest with respect to the contents of manuscripts being accepted or rejected.
4. not using unpublished information disclosed in a submitted manuscript for their own research purposes without the authors' explicit written consent.
5. involving in the investigation of any reported act of unethical publishing behavior, even if it is discovered years after publication.

### **Publisher's responsibilities**

Bio Tech System is the sole publisher for JBR. The publisher's responsibilities are as follows.

1. finalizing the accepted manuscript for online publication through minor editing, modification, and correction.
2. publishing finalized articles online and maintaining JBR's website.
3. promptly correcting any recognized significant inaccuracy, misleading statement, or distorted report in a published paper.
4. if, after an appropriate investigation, a published paper is proven to have engaged in scientific misconduct, fraudulent publication, or plagiarism, the paper will be retracted, and the retraction will be clearly identifiable to readers and indexing systems with the retraction reasons.
5. if a submitted paper has been officially accepted by the JBR for publication and the author(s) decide to stop publication process for whatever the reason(s), the paper will be identified as the retraction paper on journal's website.
